

# ESTEL CLUA I SÁNCHEZ

## BIOMEDICAL ENGINEERING STUDENT

I am a fourth-year student, and I am highly motivated to start my professional career on the Biomedical Engineering sector. My current interests rely on obtaining an internship or new job opportunity related with biomedical imaging, data science, biomedical devices, or other areas of this wide field, to gain a deeper knowledge and experience in this world.

## PERSONAL SKILLS

- » Teamwork and responsibility
- » Problem solving
- » Organization skills
- » Desire to learn and progress

## IT SKILLS

Python	Meshlab
Matlab	3DSlicer
Meshmixer	Simulink

## EDUCATION

### Universitat Pompeu Fabra, Barcelona

Bachelor's Degree in Biomedical Engineering (English)

*September 2018 - present*

### Institut Icària, Barcelona

ESO and Scientific Batxillerat. Honourable mention

*September 2012 - June 2018*

### Conservatori del Liceu, Barcelona

Professional Degree in Classical Piano

*September 2015 - June 2021*

### Università degli Studi di Palermo, Italy

Erasmus - Master's Course: Statistical Analysis of Biomedical Signals

*February 2022 - July 2022*

## WORK EXPERIENCE

### Private lessons teacher, Barcelona

- Freelance
- Mathematics, physics, chemistry, electronics.

*September 2016 - June 2021*

## LANGUAGES

**English** - Professional Working Proficiency (C1)

**Italian** - Limited Working Proficiency (B1)

**Spanish** and **Catalan** - Native Bilingual Proficiency

To whom it may concern,

I am very motivated to start applying my knowledge in real cases such as this internship, this is why I am truly interested in this opportunity.

I am currently in my last year of Biomedical Engineering at Pompeu Fabra University. I think this collaboration could be very useful for my personal and professional development. In addition, I believe that I could bring enthusiasm for a job well done, responsibility, skills and knowledge.

Throughout my training, I have developed my spirit of teamwork, initiative and involvement in tasks. I am looking forward to learning new things, to developing my skills in the area of biomedical engineering, and to being able to contribute to this professional sector. I consider myself a disciplined, constant and a responsible person.

My interests in this field are mainly software development, biomedical imaging, image analysis, programming, AI, data science, etc., although I am also open to other areas available in this sector.

I have total availability to adapt to the schedules and working methods that work best for me to join this internship.

I am at your disposal for an interview.

Thanking you for your attention, I send you my best regards.

Sincerely,

Estel Clua
